

Hammond Power
Solutions Inc.

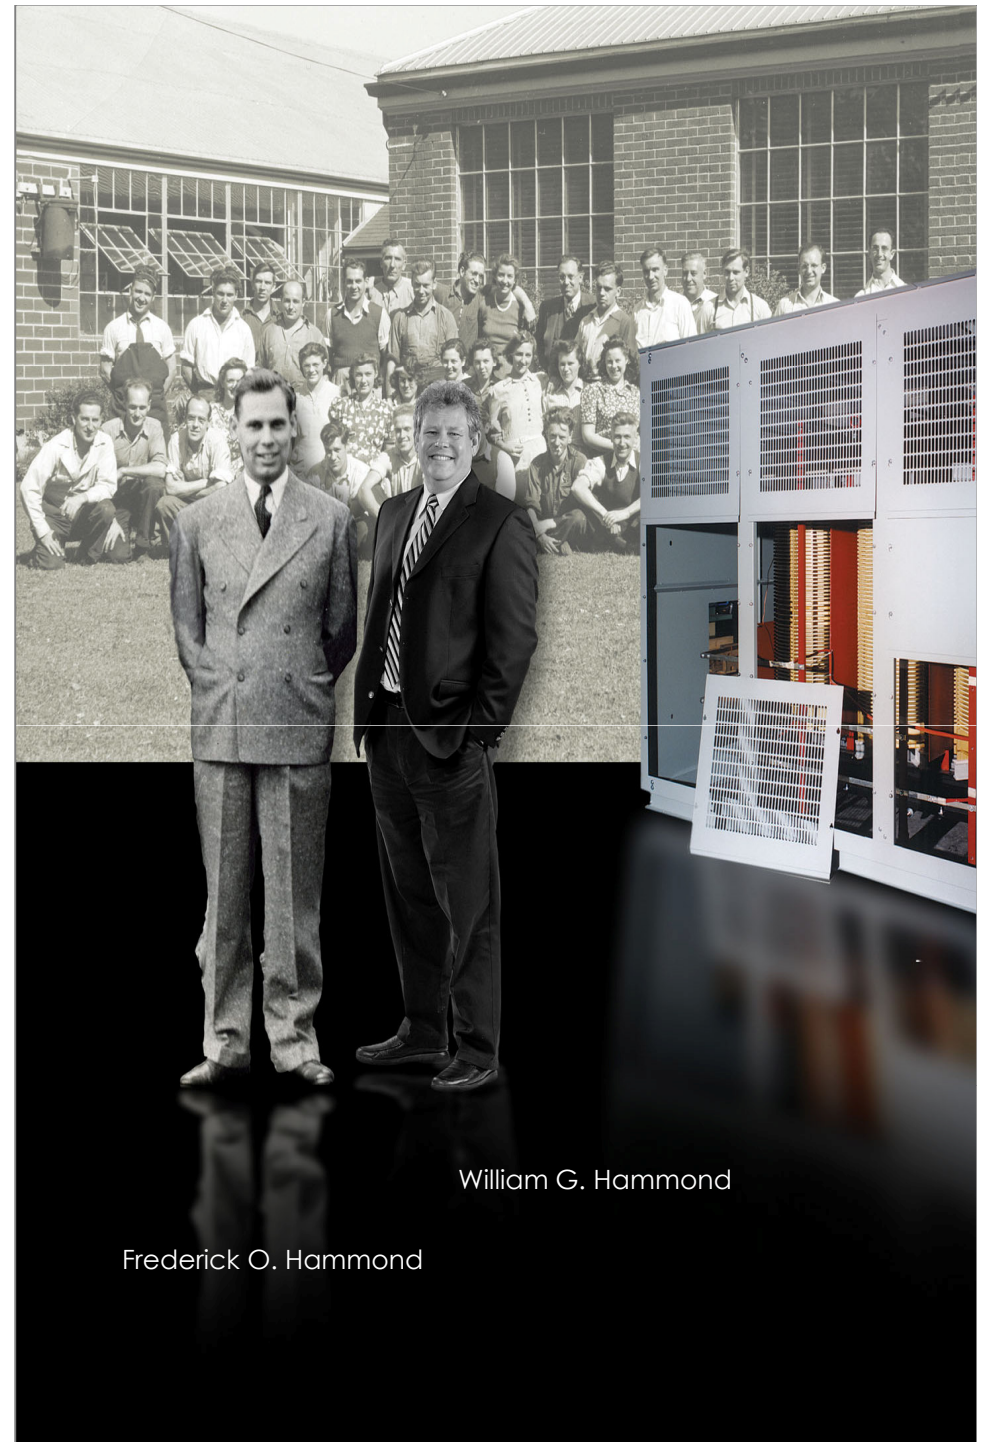

Company Profile

An overview of our history, structure,
performance, and services.

Generations of Production

The Hammond story began when Oliver Hammond established a small manufacturing enterprise in his home in 1917. Grown under the direction of sons Len, Roy, Fred, and Ken, HPS developed and built products such as battery eliminators, trickle chargers, and power amplifiers. After 1925, the Hammond brothers began to focus their efforts on the design and manufacture of specialized transformers for the broadcast and electrical industry.

CEO Bill Hammond continues the tradition of hard work and honest business started over 90 years ago.

About Us

Hammond Power Solutions Inc., is the largest manufacturer of dry-type transformers in North America. We engineer and manufacture a wide range of custom transformers that are exported globally in electrical equipment and systems. We support solid industries such as oil and gas, mining, steel, waste and water treatment, and wind power generation.

HPS leads the industry in these markets through its technical design strength, breadth of product, and manufacturing capabilities, making HPS a stronger company both fundamentally and financially.
