

# HPS IS A PROUD PARTNER IN THE NEMA PREMIUM® EFFICIENCY TRANSFORMER PROGRAM

The National Electrical Manufacturers Association (NEMA) has initiated the NEMA Premium® Transformer Program, which will help utilities, commercial building owners, and industrial plants incorporate super high-efficiency electrical transformers into their operations.

The new NEMA Premium® Efficiency Transformer designation requires 30% fewer losses than existing DOE regulations (10 CFR 431) for low-voltage dry-type distribution transformers.

HPS offers three lines of Super Energy Efficient Distribution Transformers that meet the NEMA Premium® Efficiency specifications:

### **HPS SuperSentinel®**

*Energy Efficient General Purpose Transformers*

### **HPS SuperSynergy®**

*Energy Efficient K-Factor Transformers*

### **HPS SuperCenturion®**

*Energy Efficient Harmonic Mitigating Transformers*

As a Partner in the NEMA Premium® Transformer Program, HPS has determined that this product meets the NEMA Premium® Efficiency specifications for premium energy efficiency. NEMA Premium® is a trademark of the National Electrical Manufacturers Associations.
