

Hammond Power
Solutions Inc.

HPS E-Systems

HPS is committed to being easy to work with and providing you the information that you need, when you need it. For our strategic and partner distributors, we have developed an online services system to provide 24 hours, 7 days a week access to our HPS database. Our E System differentiates us from other transformer manufactures by providing you with a competitive advantage. Distributors are able to respond to their customer's needs quicker, more accurately, and in greater detail than ever before. We offer individuals access through our website to the following information below and much more.

1. Quote or specify standard and custom product
2. Quote history for your branch location
3. Ability to check price, availability and lead times on HPS or competitor part numbers
4. Nameplate and product specification data
5. Order status including confirmation of receipt of PO and open order reports
6. Shipping schedule, carrier, and tracking information on orders
7. Invoicing
8. Electronic Literature including the entire catalog
9. ISO Certificates
10. Installation Manuals
11. Training Information

This system is extremely user friendly. If you can use any windows based program you can use E System. We are often told that this is the best system out there. For access to this system, please contact your local manufacturer's representative or see the instructions below.

E-System Access:

Access the login screen by going to our website at www.hammondpowersolutions.com and clicking the "Login" button. Click the E-Quote button on left, then select the link provided "click here" to login which will open a new window. Once the screen opens up click on the new member registration button, complete the form and click submit. You will receive a login and password via email within twenty four hours. If you do not receive the login or password please contact:
