NQTW1 Wall Mounting Kit Installation Instructions

This HPS wall mounting kit is designed for 30 and 45 kVA three phase encapsulated transformers.

Features of this mounting kit are:

- Manufactured from heavy-duty angle steel for maximum support
- Wall mounting brackets finished in matching ANSI 61 UL 50 Grey
- All hardware to attach to transformer is supplied
- Mounting brackets come with three wall mounting holes for maximum holding strength

This mounting kit is specifically designed for three phase HPS TITAN encapsulated transformers in either NQT7 and NQT8 enclosures.

Your NQTW1 Mounting Kit includes the following components:

- 1 set - wall mounting brackets for NQT7/8 enclosure
- 4 - 1/2-13UNC x 1 1/2 HHCS
- 4 - 1/2-13UNC hex nut
- 4 - 1/2 Lock Washer
- 4 - 1/2 Flat Washer
- 1 - NQTW1 Manufacturing Instruction Bulletin

If you appear to be missing any of the above listed parts, please contact your HPS authorized distributor or our customer service department immediately.

Please follow carefully the instructions on the reverse side for installation of the NQTW1 wall mounting kit. If you have any questions regarding these instructions, please feel free to contact our customer service department directly.

NQTW1 Wall Mounting Kit Installation Instructions

Wall Mounting Instructions

- 1) Lift unit using appropriate rated fork lift.
- 2) While supported, attach the two wall mounting brackets (A) using the four sets of supplied hardware (bolt, lock washer, washer and nut).
- 3) Raise unit into place against wall and mark each of six mounting holes.
- 4) Carefully, using a properly rated fork lift, raise the transformer into your pre-measured, marked and drilled position and attach the unit to the wall using minimum of Grade 8 hardware.

IMPORTANT

Please ensure your wall mounting location and position meets all local building and fire codes and regulations.
